

TAWESHAL DEV THAKUR

Associate Quality Assurance

Kathmandu, Nepal | +977 9823348580 | thakur2sl.py@gmail.com | linkedin.com/in/taweshal-dev-thakur-656a8a273 | github.com/taweshaldev99

PROFESSIONAL SUMMARY

Associate Quality Assurance with hands-on experience in manual QA testing, CRM and HRMS platforms, and project tracking, having progressed from a Quality Assurance Intern role within the same company. Builds on a technical foundation in Python, SQL, and data analysis to bring quality, data-driven rigor to testing and release cycles. Comfortable designing test cases, tracking defects, and coordinating with cross-functional teams to ensure timely, quality delivery. Seeking to grow further in QA and data engineering.

SKILLS

Project & QA: Project Coordination, Task & Timeline Tracking, Manual QA Testing, Test Case Design & Execution, Bug Reporting, Defect Tracking

Technical: Python, SQL, PostgreSQL, Pandas, NumPy, Exploratory Data Analysis (EDA), Git/GitHub

Business Systems: CRM Platforms, HRMS Platforms

Core: Team Collaboration, Cross-Functional Communication, Time Management

PROFESSIONAL EXPERIENCE

Associate Junior QA

Yoddha Lab Private Limited

July 2026 – Present

Kathmandu, Nepal

- Perform manual QA testing, including test case design and execution, to verify functionality prior to release.
- Identify, document, and track defects, working with cross-functional teams to help reduce post-release issues.

Quality Assurance Intern

Yoddha Lab Private Limited

March 2026 – July 2026

Kathmandu, Nepal

- Supported project and team coordination using CRM and HRMS platforms to track activity across departments.
- Assisted in monitoring project tasks, timelines, and deliverables through internal project management tools.
- Contributed to formal QA processes, including test case review and quality checks prior to release.

PROJECTS

Kathmandu Bus Stops ETL

github.com/taweshaldev99/kathmandu-bus-stops-etl

2025

- Built a complete ETL (Extract, Transform, Load) pipeline to process Kathmandu's public bus stop and route data.
- Used Python libraries, including Pandas and NumPy, to clean, normalize, and transform raw datasets into structured formats.
- Designed and implemented a relational schema in PostgreSQL for efficient data storage and querying.
- Documented the workflow and maintained version control using GitHub.

EDUCATION

Bachelor of Information Technology (BIT)

Purbanchal University

2022 – Present

Kathmandu, Nepal

CERTIFICATIONS & TRAINING

- Python for Beginners — Udemy
- Data Analysis with Python — KIST

KEY ACHIEVEMENTS

- Maintained strong academic performance throughout the BIT program at Purbanchal University.
- Recognized for active participation and teamwork in university-level sports competitions.
- Participated in KIST Hackathon 2025, collaborating with a team to develop software solutions under time constraints.
